

OLIVIA ARCHITECTURE PORTFOLIO

A High-Performance, Privacy-First, Desktop-Aware Local AI Companion

Olivia v8

Real LLM backbone (GGUF via llama-cpp-python) + RAG (SQLite + MiniLM embeddings) + your existing persona documentation.

Files

- **config.json** — all paths, knobs, model defaults
- **system_prompt.md** — Olivia's persona (editable)
- **models/*.gguf** — symlinks to your real models
- **embedder/** — MiniLM cache
- **memory/olivia.db** — vector store + chat history
- **persona_docs/** — Olivia_Master_Guide.pdf, Olivia_User_Guide.pdf, ROADMAP.md
- **knowledge/** — symlinks to folders you want her to know about
- **logs/** — runtime logs

Quickstart

```
# 1. Ingest persona docs (generates the real system_prompt.md)
python3 ~/Downloads/Projects/olivia_v8_ingest.py --persona

# 2. Ingest your knowledge folders
python3 ~/Downloads/Projects/olivia_v8_ingest.py \
  "/home/fudora/Documents/Olivia 4models teacher upgrade v7.0/olivia/data/books" \
  "/home/fudora/Downloads/Projects"

# 3. Chat
python3 ~/Downloads/Projects/olivia_v8_chat.py
python3 ~/Downloads/Projects/olivia_v8_chat.py --model deepseek    # for code
python3 ~/Downloads/Projects/olivia_v8_chat.py --model qwen
```
